GTECHNIQ

EXOv4 is Gtechniq's ultimate hydrophobic coating – it simply out-beads any other products on the market. By providing, a lotus leaf effect which repels dirt and water, EXO ensures your vehicles surface stays cleaner and glossier for much longer.

EXO embodies Gtechniq's goal to offer products that work harder and smarter, meaning more time enjoying your car and less time maintaining it.

G1

Glass Coating

Unlike regular rain repellent coatings that adhere to the surface of the glass using relatively weak physical bonds, GI Glass Coating uses a chemical bond which gives GI Glass Coating unrivalled durability. GI's excellent durability and exceptionally low smear characteristics make it ideal for car windscreens.

G1和一般拨水剂有着巨大的分别，因为在前挡玻璃使用，所以G1具有超强的硬度，足以抵抗雨刷的使用而不会轻易磨损。

Leather Coating

L1 prevents dye transfer onto pale leather, typically preventing in auto interiors. L1 is ultra durable, stain resistant and offers significant abrasion resistance.

L1有效的增加皮革使用寿命，防止皮革褪色及老化，更具有抗污耐磨损的特质。L1智能结晶保护层可有效防护液体渗出，食物，防褪色及老化，且耐脏易清洁。

L1 Leather Coating Smart Surface Science
Protect Against:
- Colour fading
- Acid rain
- Oxidisation
- Road Grime

I1

Fabric Coating

Unlike regular fabric coatings the nanoparticles of I1 Fabric coat the individual fibres of the fabric, thereby leaving the breathability and feel of the fabric unaffected. The former means that stale air can still escape but at the same time repels any water or oil based liquids. Being solvent based ensures a much deeper penetration of the active ingredient giving a I1 Fabric Coating treated surface better durability and overall performance than current generation fabric sealants.

I1可以轻易的渗透纤维或一般布料，进而形成接近完美的保护，而且完全不影响纤维或布料本身的空气流通。I1智能结晶保护层可耐脏易清洁。

C4

Plastic Coating

C4 utilises a covalent or chemical bond to actually become an extension of the plastic molecule it's protecting. Not to be confused with much weaker electrostatic bonds used by, amongst others, ptfe based polymers C4 actually swaps part of its molecular structure with the surface molecules of your car's trim.

C4的 PTFE based 的聚合物可更坚固的与车身外的塑胶结合，进而提供塑胶本身所没有的防护效果。能有效地延长塑胶寿命，防止塑胶硬化与褪色。

PERMANENT TRIM RESTORER 3S NANOCOAT
C4
Gtechniq

C5

Wheel Coating

Independently proven to outlast other rim coatings, C5 Wheel Coating uses a unique chemical bond to become the functional surface of your rims making them dirt and brake dust repellent as well as being much easier to clean. A single application lasts up to 12 months.

C5可在轮圈表面形成坚硬抗污的保护层。经C5处理后的轮圈将具有耐刷洗，抗污，且容易清洗等特性，并且不易沾黏刹车皮的铁粉。一次的护养可以保持对轮圈高达12个月的保养。
